‘Living Social Science’ – a new concept

A new online database for “state of the art entries” in Sociology

sociopedia.isa is a new concept in the production and dissemination of knowledge. It combines the best of two worlds: the opportunities the Internet offers for rapid publication and the scientific quality guaranteed by thorough and imaginative editing and peer review. While experienced editors and peer review ensure the highest possible quality, the Internet makes it possible to provide the most recent “state of the art” assessments. **sociopedia.isa**, then, offers ‘living social science.’

sociopedia.isa is an ISA Presidential Project developed by four founders, Izabela Barlinska, Bert Klandermans, Kenji Kosaka and Michel Wieviorka, ISA President (2006-2010). It is a joint venture of the International Sociological Association and SAGE Publications (www.sagepublications.co.uk)
