Remarks from the RC09 Chairs

The topic of our Research Committee contributes to the move that the next World Congress represents for sociology as a discipline! We received a large number of interesting abstracts that focus on a wide spectrum of critical topics and important themes such as the socio-economic crisis, globalization, inequality, civil society organizations and development, labor markets and labor migrations, and governance and sustainability. Sociologists from all continents are on the move, tackling questions such as: What are the most pertinent approaches to study social crises? What are the consequences of the current crisis for societies? Which factors contribute to social transformations and economic, political and social development? The sessions provide space for a broad spectrum of empirical and theoretical approaches as well as interesting collaborations with other social sciences or other sub-fields of sociology.

You will see from the detailed program listed below that we accepted more papers than we expect to be presented due to last minute cancellations. Please inform your chair(s) as soon as possible if you have a problem with coming so that we may accept papers for presentation that are otherwise listed as distributed to the audience.

We look forward to seeing you all in Gothenburg in July and extend a kind invitation to you to join us for the Business Meeting on Tuesday, July 13, at 17:45, followed by a Reception!

Ulrike Schuerkens and Nina Bandelj, Program Coordinators and RC 09 Co-chairs

Join us in Gothenburg, Sweden in 2010 for the XVII ISA World Congress of Sociology

The theme of the World Congress is “Sociology on the move”

Determinism is dead in the social sciences. Despite a strong interest in social structures, social mechanisms, forms of reproduction, we are all aware that human beings are not completely dominated by them. The world changes, and this change to a large extent depends on human action and imagination.

If sociology is to be useful, it has to contribute to an understanding of change – and it has to change itself. It is on the move and has to be on the move because the world, the societies, collective and individual actors are on the move.

“Sociology on the move” means that our discipline contributes to an understanding of our world by defining new objects of research, devising new approaches and reevaluating its rich heritage. It implies a new openness with regard to other disciplines and to normative questions. The International Sociological Association offers an enormous variety of perspectives – in terms of cultures, gender and generation. They all contribute to the vitality of our discipline.

For airline discounts see http://www.isa-sociology.org/congress2010/support_wording.htm.

Note that Gothenburg has two major airports, the Göteborg Landvetter Airport (GOT, 25km to the East) and Göteborg City Airport (GSE, 15km North-West from the centre). Both airports are well connected to the city by bus (US\$7-12). There seems to be some competition, so you may wish to compare air fares for both.
