Message from the incoming president

Dear Members of the Research Committee on Social Movements, Collective Action, and Social Change,

I hope this letter finds each of you in good health and high spirits. It is with immense joy and gratitude that I write to you today as the newly elected President of our esteemed Research Committee for the 2023 - 2027 period. I am truly honoured and humbled by your trust and confidence in me to lead our committee during this exciting and challenging time.

As we embark on this new chapter together, I want to express my enthusiasm for the journey ahead and share with you my vision and priorities for the upcoming term. Over the next four years, I am committed to focusing on four key areas that I believe are essential for the growth and vibrancy of our committee: supporting the new generation of PhD students, developing a community of knowledge among all RC48 members, creating a collaborative network, and being more politically active in the public sphere.

1. Supporting the New Generation of PhD Students:

One of my primary goals is to provide robust support for the emerging scholars in our community. The future of our field rests in the hands of the new generation of PhD students, and it is crucial that we invest in their success. The establishment of mentorship programmes, PhD workshops, and resources specifically tailored to the unique needs of early-career researchers are some of the strategies that I aim to implement during the upcoming four years. Through these initiatives, we can ensure that our committee becomes a nurturing environment for the academic and professional growth of new scholars and thinkers.

Finally, I want to express my gratitude to Liana Daher for all her hard work during the past four years as RC48 President. She has been crucial to the development of the good health of our research committee and the growth of our activities.

Once again, thank you for giving me this incredible opportunity to serve as your president. I am excited about the possibilities that lie ahead and look forward to working collaboratively with each and every one of you. Together, we can make meaningful strides in advancing our understanding of social movements, collective action, and social change.

Please feel free to reach out with your thoughts, suggestions, and ideas. I am eager to hear from each of you as we embark on this collective journey.

Warm regards,

Camilo Tamayo Gomez
President
Research Committee on Social Movements, Collective Action, and Social Change
International Sociological Association (ISA)

Research Committee on Social Movements, Collective Action and Social Change  3
2. Developing a Community of Knowledge between all RC48 Members:

Our committee is a diverse and talented group of individuals with a wealth of knowledge and expertise. To harness this collective wisdom, I plan to focus on building a strong sense of community among RC48 members. This will involve creating platforms for regular communication and a series of online seminars with the purpose of fostering an environment where ideas can be freely shared and promoted. By developing a cohesive and interconnected community, we can amplify the impact of our individual efforts and contribute to the advancement of our shared objectives. One of the main purposes here is to develop collaborative projects between all members of RC48.

3. Creating a Collaborative Network:

In an era of increasing interconnectedness, collaboration is more crucial than ever. I intend to actively pursue opportunities to establish and strengthen collaborations with other research committees, academic institutions, and organisations that share our commitment to understanding, researching, and promoting social movements, collective action, and social change. By building a broad collaborative network, we can enrich our perspectives, share resources, and address complex challenges more effectively.

4. Being More Politically Active:

The issues we study and the movements we analyse are inherently political. To make a meaningful impact on society, we must be actively engaged in the broader political discourse. I propose that our committee take a more proactive stance in advocating for evidence-based policies, participating in public discussions, and leveraging our research to address pressing social issues. By being more politically active, we can ensure that our work contributes to positive change on a larger scale.
Finally, I want to express my gratitude to Liana Daher for all her hard work during the past four years as RC48 President. She has been crucial to the development of the good health of our research committee and the growth of our activities.

Once again, thank you for giving me this incredible opportunity to serve as your president. I am excited about the possibilities that lie ahead and look forward to working collaboratively with each and every one of you. Together, we can make meaningful strides in advancing our understanding of social movements, collective action, and social change.

Please feel free to reach out with your thoughts, suggestions, and ideas. I am eager to hear from each of you as we embark on this collective journey.

Warm regards,

Camilo Tamayo Gomez
President
Research Committee on Social Movements, Collective Action, and Social Change (RC48)
International Sociological Association (ISA)

c.a.tamayogomez@hud.ac.uk
Dear colleagues, members of RC 48

It was a great honour to serve as President of RC48 for the last five years and a greater pleasure to work with such a cooperative and active board.

My years as President were marked by achievements for our Research Committee, but also by several difficulties in particular brought by the pandemic.

The ways to get in touch and communicate have radically changed, and we were unable to meet in person for a long time, and this has certainly been the greatest difficulty during the last years. But, the RC48 Committee did not stop the activities, two online conferences were organised with good success in term of participation, the proceedings are already published (see the publication section of this Grassroots) or will be published soon; our newsletter, Grassroots, has been restyled; a new RC48 website was built, the Facebook page improved, and many other initiatives were carried out thanks to the support of the more active and involved board members.

It was awesome to meet you in-person at the World Congress in Melbourne. Even if our XX World Congress was held in a hybrid format it registered almost 70% of in-person participation coming from all over the world. This number was clearly confirmed by the attendance to the RC48 sessions: Melbourne was in fact successful with wide participation of RC48 members. We were also proud to have organised, as a pre-congress event, the 3rd RC48 PhD Workshop, that is, let me to say, the flagship of our committee. My five years as President have been characterised by the openness to young researchers of Social Movements, and seeing such a large participation to the workshop and then to our sessions and business meeting was for me the greatest reward of my time as President.

I’m fully aware and glad to have left RC48 in safe and capable hands. This is why I would like to thank the new RC48 President,
Camilo Tamayo Gomez, first. We worked closely and hard to make our network larger and more attractive, especially for young researchers; we put a lot of efforts in order to make our committee more inclusive and solid, trying to include in our activity the largest number of emergent topics related to social movements and collective action and to start and strengthen cooperation with other ISA Research Committees, during and out of official events, such as World Congress or Forum; and last but not least we worked a lot in constructing relationship with younger Social Movements researchers that are the future of our committee.

I will continue to serve in the board for the next four years, but I think that this is a good chance to say thanks also to the other board members who closely collaborated with me in leading the committee: Tova Benski, Benjamin Tejerina Montaña, Natalia Miranda, and Kaan Agartan, with the hope of continuing our fruitful collaboration in this and other settings. Finally, I wish Camilo, Natalia, Kaan, and all the new RC48 board great success in their efforts, sure that we will do an excellent job in cooperation with the newest members.

Sincerely,
Liana Maria Daher
About RC 48

The Research Committee on Social Movements, Collective Action and Social Change (RC48) is part of the International Sociological Association (ISA). It was founded as a Working Group in 1992, under the presidency of Prof. Bert Klandermans. In 1994, it was recognized as an ISA Research Committee.

The objective of RC48 is to foster intellectual, academic and scholarly exchanges between researchers of broadly defined social movements, collective action and social change. The RC48 is currently based at the Collective Identity Research Centre (Department of Sociology 2, University of the Basque Country, Spain).

The ISA was founded in 1949 under the auspices of UNESCO. With more than 5,000 members coming from 167 countries, the ISA is currently the most important international professional association in the field of sociology. Its goal is to advance sociological knowledge throughout the world, and to represent sociologists everywhere, regardless of their school of thought, scientific approaches or ideological opinion.

The on-going scientific activities of the ISA are decentralised in 55 Research Committees (RC), 3 Working Groups (WG) and 5 Thematic Groups (TG), each dealing with a well-recognized specialty in sociology. These groups bring together scholars who wish to pursue comparative research on a transnational basis and they constitute basic networks of scientific research, intellectual debate and professional exchange. Although they must fulfil certain minimum requirements, RCs have complete autonomy to operate. Each RC’s governing body is the Board, formed by a President, a Secretary, and a variable number of board members. RC48 participates in the organisation of both the ISA World Congresses, celebrated every 4 years since 1950 (Zurich), and the ISA Forums of Sociology, also celebrated every 4 years since 2008 (Barcelona).

In contrast to the ISA World Congress, which has a more professional and academic character, the forum’s original purpose was to establish an open dialogue with colleagues...
About RC 48

doing sociology in public institutions, social movements, and civil society organisations. This means that every two years, we are involved in the organisation of a worldwide event. In between ISA World Congresses and forums, our committee organises smaller scientific meetings called RC48 international conferences. These meetings tend to be more narrowly focused than other ISA events and, on average, they gather between 30 and 60 scholars. Consequently, colleagues can make longer presentations, and we can go hold deeper and more enriching debates.

HIGHLIGHTS FROM THE CONGRESS

Gezi in Retrospect: Recalling Mass Protests and Reclaiming Alternative Political Imaginations

Historicizing Gezi Park Protests, by Selin Bengi GUMRUKCU, Rutgers University, USA

Solidarity Failed: Organising the Neighbourhood Ten Years after Gezi, by Begum FIRAT, Mimar Sinan Fine Arts University, Department of Sociology, Turkey

Political Emotion, Political Horizons, and the Question of Composition in 2023, by Deborah GOULD, University of California, Santa Cruz, USA

Chair report by Derya Özkaya Öztürk, University of Graz

Taking the 10th anniversary of Turkey’s Gezi uprisings as an opportunity to critically reflect on multiple dimensions of mass protests and their afterlives, particularly within the authoritarian political contexts, my colleague Kaan Ağırtan and I proposed the panel “Gezi in Retrospect: Recalling Mass Protests and Reclaiming Alternative Political Imaginations.” Rather than indulging in a romanticised nostalgia for the effervescence of the occupied parks and squares and popular protests in the streets without questioning their ambivalences, we employed a critical perspective to analyse not only the emancipatory potentials but also the limitations of popular uprisings and mass protests. Our main intention was to move beyond commemorating Gezi itself and bring together multiple perspectives to discuss the possibilities of developing alternative political imaginations inspired by and emerging from this experience.
In this Invited Session, which I had the privilege to chair, noteworthy presentations by Begüm Özden Fırat, Selin Bengi Gümrükçü, and Deborah Gould offered nuanced perspectives on the multifaceted and even contradictory nature of mass mobilizations. Employing a relational and longitudinal approach to analyse their role and impacts on other protest movements prior to or following them, Fırat presented a case study on the organisation of solidarity networks during the Covid-19 pandemic, interrogating the handicaps of neighbourhood-based organisations inspired by the post-Gezi local mobilizations in Istanbul. Gümrükçü directed attention to the need for historicizing the Gezi uprisings, showing the important role of previous cycles of protests in the formation of such out-of-ordinary experiences of collective resistance. Locating the Gezi uprisings in a broader resurgence of protest movements of the last decade across the world, and zooming out from Gezi as a specific case, Gould contributed to the panel with a conceptual discussion around the (trans)formation of a left composition and its structure of feeling as a sense of political (im)possibility. Questioning the shifting structures of feeling of movements from the last 10-15 years, including Gezi, Gould invited the participants of the panel to think about the Left’s compositional tasks in this conjuncture.

Facilitating the exchange of ideas among such esteemed scholars - whose extensive research and publications on social movements, contentious politics, political emotions, and collective action have served as invaluable sources of inspiration for numerous critical researchers, myself included- was both a responsibility and a pleasure. This valuable experience was both enriching and thought-provoking in terms of critical reflection on what remains of popular uprisings within the context of a short-lived but momentous political event in Turkey and also on developing alternative perspectives on the changing social and
emotional composition of the current protest movements and political activism of the Left. The lively interaction among panelists and the valuable contributions of the audience played a key role in shaping an engaged discussion which we felt sad to conclude due to time constraints. However, we all expressed our willingness for further dialogue in different formats. I look forward to future collaborations.

I extend my sincere gratitude to the insightful panelists who shared their expertise and perspectives, and also to my colleague Kaan Ağartan for sharing this experience with me. I appreciate the efforts of the conference organisers, particularly RC 48 members, for orchestrating such a stimulating event.
FUTURE VISIONS, STRATEGIES, AND CONTENTIOUS POLITICS. PART II

Critical Agency and Creative Imagination: Snapshots of the Future in Youth Movements, by Paola REBUGHINI, Milan University, Italy and Lidia LO SCHIAVO, University of Messina, Italy

Migrant Youth Activism and Alternative Inclusive Futures, by Ana-Maria NIKOLAS, DeZIIM-Institut, Germany

How Do Social Movements Construct Long-Term Visions through Interactions between Generations of Activism? the Case of Two Generations of Feminist Activism in Peru and Ecuador, by Anna-Britt COE, Umeå University, Sweden

Feminist Nationalism and Future Visions: The Case of Catalonia, by Begonya ENGUIX GRAU, Universitat Oberta de Catalunya, Spain

Beyond the Horizons: The Eu's Narratives on Post-Transition World, by Aleksandra WAGNER, Jagiellonian University, Krakow, Poland

Chair Report by Livia Tavera Fenollosa, Facultad Latinoamericana de Ciencias Sociales

This all women panel raised a most interesting discussion on social movements and their contribution to the creation of better futures in Europe and Latin America. Based on the study of various movements, most of which are youth based, the authors presented a compelling picture of when and how can social movements in Italy, Germany, Catalonia (Spain), Perú, and Ecuador...
are sources of democratic innovation and change, understood as new forms of addressing the malfunctioning of democratic institutions. In the context of disaffection with (liberal) democracy and general distrust on political institutions, papers presented in the session highlighted how youth movements are practising other conceptions of democracy that, if not opposed, are certainly different from liberal representative democracy, resonating with ideas of a more participatory and more deliberative democracy. In general, even though confidence in political institutions and politicians is very low, the cases studied point to the confidence of young people to build a better society especially if collectively organized. In the case of long-lived movements such as the feminist movement in Latin America, innovation and long-term visions involve intergenerational collaboration.

REPORT ON THE THIRD PhD WORKSHOP
MELBOURNE, AUSTRALIA

Sérgio Barbosa, University of Coimbra, Portugal

"In my presentation, I draw from seven years practising digital ethnography on WhatsApp from Brazil. It showcased how chat app-based technologies bypass the traditional structure of how grassroots engage at the local level, focusing on the interactions of two progressive groups located in Florianópolis, the capital city of the state of Santa Catarina in the south of the country. I explored the role of chat app activism in democratic mobilisation and local participation against the background of turbulent political episodes in Brazil. I received very useful feedback from the organisers, including a reference list, as well as strong advice from my PhD colleagues, which will be very useful in the final steps of my thesis writing, expected to be delivered next year to the University of Coimbra."

Sérgio Barbosa is a doctoral candidate at the University of Coimbra. He is a research fellow at the Institute for Advanced Studies on Science, Technology and Society (IAS-STS), TU Graz. He was a Digital Humanism Junior Visiting Fellow at the IWM in 2023.
Report on Third PhD Workshop

Lea Loretta Zentgraf, Heidelberg University, Germany

The RC48 PhD workshop was one of my highlights at the ISA World Congress 2023 in Melbourne. I really enjoyed the exchange and fruitful discussions with other young scholars and especially appreciated the open and non-hierarchical atmosphere with the senior scholars. I also learned a lot about the similarities and differences between social movement research in different contemporary geopolitical scenarios.

The comments and feedback on my work have been inspiring to continue with my dissertation on “Gender. Power. Food: women's claims and actions in food movements in Germany”. In my research I want to find out how the issue of intersectional gender inequalities is mobilised in food movements and what different demands and actions are being contested in the public sphere for a more socio-ecological transformation towards a more just, equal and democratic food regime in Germany.

Lea Loretta Zentgraf is a doctoral researcher in the BMBF-Junior Research Group Food for Justice: Power, Politics and Food Inequalities in a Bioeconomy at the Heidelberg University, Germany.
Aliye Nur Kelesoglu, University of Malaya, Malaysia

The PhD workshop organised by RC48 was a truly enriching experience for me. In the workshop, we presented our PhD theses, but it was more than just presentations; it was a valuable opportunity for learning and engaging with other PhD students and academics. The advice and feedback from experts in social movements studies was particularly impactful. For instance, they pointed out that my theoretical framework relied on somewhat outdated theories and suggested more current and relevant ones. This advice proved incredibly helpful because, after further research, I realised that the new theories were more suitable for my research. The recommendations not only enhanced my thesis but also prepared me well for my PhD viva.

Another aspect that made the workshop memorable was the warm and inclusive atmosphere. Everyone was exceptionally kind and welcoming, creating a comfortable and enjoyable experience. The connections I made there have lasted beyond the workshop, adding a wonderful dimension to my academic journey. I am truly grateful to the RC48 team and the ISA for their efforts and for giving us this opportunity.

Aliye Nur Kelesoglu is a doctoral candidate at the University of Malaya.
We invite you to follow us on social media.

Socioecos are inviting proposals that explore socio-ecological practices concerning the climate crisis in different areas: social movements; new production and labour models; living and consumption; rewilding and nature preservation; citizen science; education and health; the human dimension of the climate emergency, awareness, consciousness, wellbeing and care; culture, media and communication; art, technology and design; and legal aspects and politics.

This international conference aims to analyse socio-ecological practices’ trajectories, characteristics, and impacts concerning the climate crisis and emergency. It also seeks to present and discuss the most recent challenges these practices present, as well as practical solutions currently being adopted. More specifically, the conference will address the following questions:

- When, where and under what conditions do socio-ecological practices occur?
- What are the characteristics of contemporary socio-ecological practices?
- What type of actors are engaged in such practices, and what forms of interaction emerge from them?
- What are the practical, symbolic, and legal effects of socio-ecological practices?

Please check out the conference’s website to learn all the details regarding how to submit your contribution: https://socioecos.org/en/international-conference-socioecos-2024/
People's archive of farmers protests

By Shamsher Singh, FLAME University, India

https://pafp.in/

The archive is an outcome of voluntary engagement with the movement and the interest in the field of agrarian relations and rural society. The objective behind this exercise, firstly, is to create a repository of the events and developments that took place during the course of the movement to develop an understanding of the progression, nature and character of the movement. Secondly, to make this information available in the public domain for creating scholarship on the agrarian issues and rural mobilisations.

ACHIEVEMENTS
Geoffrey Pleyers (Professor of Sociology, UCLouvain, Belgium)
Elected president of the ISA in July 2023
About this PhD Workshop

The aim of the ISA RC48 PhD Workshop is to invite international PhD students working in the field of social movements to discuss their doctoral projects in an open and helpful environment. Each participant will have the opportunity to present her/his doctoral project in a stimulating international setting and receive theoretical and methodological feedback from both senior and junior scholars as well as other students. The Workshop will discuss recent developments in the field, publication, and career strategies, and provide an opportunity to network with other social movements scholars within the ISA community.

PhD Workshop guidelines

The workshop welcomes submissions by doctoral students at any stage of their PhD, as well as students who are close to completing their PhD. Proposals are welcome in the areas of social movements and collective action.

Proposals should be submitted in English in the form of extended abstracts. The abstracts should not exceed 1,000 words and should be submitted by April 01, 2024. The abstract and a short bio (max 300 words) must be sent by email to one of the workshop organisers (see below).

Proposals will be selected by a Scientific Committee following a peer-review process and on the basis of the scientific excellence of the proposal. The Scientific Committee will aim to choose a fair representation of proposals from different regions and areas of social movement research.

Future participants will receive the outcome of their application on May 01, 2024. The PhD Students must become ISA RC48 members before the Workshop.

The workshop will take place at the University of Catania in Catania, Italy, on September 12 and 13, 2024. RC48 will provide refreshments and a light lunch during the days of the workshop.

All selected participants will be required to submit a full paper (no more than 8,000 words) in Word format by August 01, 2024, to the workshop organizers. This is essential in order to make sure that participants get the most out of this workshop.

Papers will be circulated in advance and allocated to the discussants. An exception will be made for early-stage doctoral students, from whom only a short paper is required (no more than 3,000 words).

Submission process

We kindly ask you to apply only if you accept these terms of conditions and are prepared to follow the proposed guidelines and deadlines.

PROJECT coordinated by Karla Henriquez

Memory and resistance: mournful lives in women victims of human rights violations as actors of society

Political violence and human rights violations have a long history in Latin America. A distinctive gender-related element emerges in women bereaved by losing a significant other due to this violence. Throughout the continent, women are mobilising through collective actions and social movements to make these victims and this violence visible and to resist forgetting these lost lives. In this context, "mourning activism" is a way for these women to demand the recognition of the value of these lives lost or threatened due to human rights violations, while at the same time asserting themselves as actors in their society.

The main objective of this project is to study duels from a gender perspective to make visible the fundamental elements of the forms of subjection that arise from the work of the duel between women due to political violence.

This project, coordinated by Karla Henriquez (UCLouvain), brings together sociologists and social psychologists based in Belgium and Chile to understand better the personal and collective dimensions of these actors, who have played a crucial role in the recent history of Latin America and are today among the few actors who are rising in the face of widespread violence in some countries in the region.

Call for Input to the Report of the Special Rapporteur on Violence Against Women and Girls to the Human Rights Council on Prostitution and Violence Against Women and Girls

DEADLINE - 31 January 2024
Purpose: The thematic report will be presented to the UN Human Rights Council at its 56th session in June 2024 and will examine the nexus between the global phenomenon of prostitution and violence against women and girls.

Background

Women and girls constitute the majority of those in prostitution. International law has recognized that prostitution is incompatible with the dignity and the worth of the human person and has included prostitution as a key element for the crime of trafficking in persons for the purpose of sexual exploitation. It has very importantly called on States to “take all appropriate measures, including legislation, to suppress all forms of traffic in women and exploitation of prostitution of women”.

Furthermore, article 9(5) of the Palermo Protocol calls on State Parties to “adopt or strengthen legislative or other measures, such as educational, social or cultural measures, including through bilateral and multilateral cooperation, to discourage the demand that fosters all forms of exploitation of persons, especially women and children, that leads to trafficking.” In a number of jurisdictions, States have adopted legislation or policies through the criminalization of pimps and traffickers and discouraging the demand that fosters such sexual exploitation.

Two international treaties are particularly relevant: one is in the 1949 Convention for the Suppression of the Traffic in Persons and of the Exploitation of the Prostitution of Other. The 1949 Convention presents two shifts in perspective on the trafficking problem, in that it views prostituted persons as victims of the procurers. The Convention[4] requires State parties to punish any person who “procures, entices, or leads away, for purposes of prostitution, another person, even with the consent of that person”; or “exploits the prostitution of another person, even with the consent of that person” (Article 1), or runs a brothel or rents accommodations for prostitution purposes (Article 2). Article 3 of the
Palermo protocol lays out the situations where the consent of the person traffickers would be deemed irrelevant. It also prescribes procedures for combating international traffic for the purpose of prostitution, including extradition of offenders.

The Convention on the Elimination of All Forms of Discrimination Against Women (CEDAW) notes that: “States Parties shall take all appropriate measures, including legislation to suppress all forms of traffic in women and exploitation of prostitution of women” (article 6). Although the CEDAW Convention does not mention violence against women and its different forms, prostitution has been included in the CEDAW Committee’s General Recommendations No. 12, 19, 35, and 38. For example, in General Recommendation no 19 on violence against women (para. 15 and 16) it noted that poverty and unemployment often force women into prostitution, and that armed conflicts often lead to an increase in prostitution. In its various concluding observations to State party reports, it also noted that the vulnerability of prostituted women and girls to exploitation is heightened based on intersecting grounds. Foreign women, and women of ethnic and other minorities - amongst others - are particularly vulnerable. Moreover, the CEDAW Committee recognised how law often facilitates marginalisation and violence (including by State agents) and it has asked States to take punitive, preventive and rehabilitative measures to protect prostituted women.

General Recommendation No. 38 on Trafficking in Women in the Context of Global Migration of 2020 has clarified the indivisible link between trafficking and sexual exploitation, while also acknowledging prostitution as a phenomenon rooted in structural, sex-based discrimination, constituting gender-based violence, which is often exacerbated in the context of displacement, migration, the increased globalisation of economic activities, including global supply chains, the extractive and offshore industries, increased militarism, foreign occupation, armed conflict, violent extremism and terrorism. It also states that sexual exploitation persists due to the failure of States parties to effectively discou-
rage the demand that fosters exploitation and leads to trafficking along with the persistent stereotypes and norms regarding male domination and the need to assert male control or power, enforce patriarchal gender roles and male sexual entitlement, coercion and control, which drive the demand, especially in the context of digital technology, for the sexual exploitation of women and girls. It also recommends that States discourage the demand and investigate, prosecute and convict all perpetrators involved in trafficking in persons, including those on the demand side. According to Article 9 (5) of the Palermo Protocol, States are obliged "to discourage the demand that fosters all forms of exploitation of persons, especially women and children, that leads to trafficking."

Reference should be made to the divergent views between advocates on the issue, with some arguing that the criminalization of any act related to prostitution, including pimping and the purchase of sexual acts, as well as the criminalization of prostituted women and girls, violates certain human rights such as the right to agency, bodily autonomy and integrity, as well as to non-discrimination. Others however argue that the acts and actors involved in prostitution should be disassociated from prostituted persons, who often come from the most marginalised communities, being considered as victims of violence, and as such, should not be criminalised and should be afforded protection, while pimps and those who pay for sex acts should be considered as their exploiters and penalised.

Objectives

The Special Rapporteur would like to receive input to better understand the relationship between prostitution and violence against women, to clarify terms, approaches and actions States should take in order to maintain the spirit of international human rights law and to effectively protect women and girls from all forms of violence.
Key questions and types of input/comments sought

The Special Rapporteur kindly seeks the support of States, international and regional human rights mechanisms, National Human Rights Institutions, civil society actors, UN agencies, regional human rights organisations, academics, victims and survivor organisations, and other stakeholders to respond to one or more of the following questions:

1. Provide examples of the hidden forms of prostitution, and explain to what extent they are recognized and dealt with as such?

2. Describe the profile of women and girls affected by prostitution in your country, and provide disaggregated data, where possible.

3. Describe the profile of those who solicit women in prostitution and whether such relations are regulated, and provide supporting data, where possible.

4. What forms of violence are prostituted women and girls subjected to (physical, psychological, sexual, economic, administrative, or other)?

5. Who is responsible for the perpetration of violence against women and girls in prostitution?

6. Describe the linkages, if any, between prostitution and the violation of the human rights of women and girls.

7. What links are there between pornography and/or other forms of sexual exploitation and prostitution?

8. How is the issue of consent dealt with? Is it possible to speak about meaningful consent for prostituted women and girls?

9. What measures are in place to collect and analyse data at the national level with a view to better understanding the impact that
prostitution has on the rights of women and girls?

10. What measures are in place to assist and support women and girls who wish to leave prostitution?

11. What are the obstacles faced by organisations and frontline service providers in their mission to support victims and survivors of prostitution?

12. What are some of the lessons learned about what works and what does not when it comes to stemming any negative human rights consequences from the prostitution of women and girls?

13. Are frontline organisations and survivors' organisations sufficiently included in policymaking at the national and international level?

14. What recommendations do you have to prevent and end violence associated with the prostitution for women and girls?

Respondents may wish to answer some but not all these questions and provide supportive information focusing on either woman, girls, or both.

**Type of submissions and how inputs will be used**

The Special Rapporteur is particularly interested in hearing from organisations that facilitate the recovery of women and girls who have been prostituted; those that are advocating for the rights of women and girls who have been prostituted; as well as from survivors.

For minors who wish to send input, the express consent of one of their parents or a guardian will also be required.

Should the number of submissions remain manageable, they will be published on the mandate’s webpage, unless they are marked by their authors as confidential or if the expressed consent of victims has not been secured.
Next Steps

Please send your contributions in English, French, Spanish, Arabic or Russian by email to hrc-sr-vaw@un.org with the subject line: Input for SR VAWG’s report on violence against women and prostitution, and no later than 31 January 2024.

To ensure accessibility of information submitted for persons with visual impairments, submissions are preferred in Word format. Please limit contributions to a maximum of 2,000 words and, if necessary, provide links to relevant documents or attach annexes.

Email address: hrc-sr-vaw@un.org

Email subject line: Input for SR VAWG’s report on violence against women and prostitution

Word limit: 2000 words (no more than 5 pages)

Accepted languages: English, Spanish, French, Arabic, Russian
