A Message from the RC15 President

Greetings from ISA Research
Committee 15, Sociology of
Health!

The period immediately following the end of the Second World War expanded multilateral discussions among countries and, as a continuation, established a world order grounded in intergovernmental organizations. For decades, the nations, united through various institutions, succeeded in halting the spread of certain forms of intolerance. Moreover, they advanced initiatives aimed at reducing poverty, hunger, and preventable diseases. However, throughout these decades, diplomatic rhetoric failed to establish a global unity that could foster health and well-being for all, across the planet. We are currently witnessing the abandonment of multilateralism and the decline of its institutions, marked by the rise of authoritarianism in different countries. We have observed the re-emergence of a 'state of nature' manifested in the

imposition of commercial interests and the neglect of global and collective public health. This is a time of many pressing questions: Which agencies, programs, or public health structures will survive budget cuts, political agendas, and regulatory changes? Which groups or corporate, ideological, and political sectors stand to benefit from this dismantling? How does the dismantling and delegitimization of global organizations affect the production and circulation of scientific knowledge in the field of health? What are the global repercussions of dismantling international health programs? Will it retreat from collective care in favour of individual responsibility, operate as a 'minimal state', or will it undertake actions characteristic of a 'selective authoritarian state'? How are health professionals, social movements, scientists, and other groups organizing to resist authoritarianism and the dismantling of institutions? These are some pressing questions that call for thoughtful and critical reflection. At ISA Research Committee 15, we hope the forthcoming International Forum in Rabat will offer a safe and supportive space for meaningful dialogue and exchange. We look forward to seeing you soon in Rabat!

Nelson Filice de Barros

Mensagem do Presidente do RC15

Saudações do Presidente do Comitê de Pesquisa 15 da ISA, Sociologia da Saúde!

O período imediatamente subsequente ao fim da Segunda Guerra Mundial expandiu as discussões multilaterais entre países e, como

consequência, estabeleceu uma ordem mundial fundamentada em organizações intergovernamentais. Durante décadas, as nações, unidas por meio de diversas instituições, lograram êxito em conter a propagação de certas formas de intolerância. Além disso, avançaram iniciativas destinadas à redução da pobreza, da fome e de doenças evitáveis. Contudo, ao longo desses anos, a retórica diplomática não conseguiu estabelecer uma unidade global capaz de fomentar saúde e bem-estar para todos no planeta. Atualmente, testemunhamos o abandono do multilateralismo e o declínio de suas instituições, marcado pelo avanço do autoritarismo em distintos países. Observamos o ressurgimento de um 'estado de natureza', manifestado na imposição de interesses comerciais e no descaso com a saúde pública global e coletiva. Este é um momento de múltiplas questões urgentes: Quais agências, programas ou estruturas de saúde pública sobreviverão a cortes orçamentários, agendas políticas e mudanças regulatórias? Quais grupos ou setores corporativos, ideológicos e políticos serão favorecidos por esse desmantelamento? De que forma o desmantelamento e a deslegitimação das organizações globais impactam a produção e a circulação do conhecimento científico na área da saúde? Quais são as repercussões globais do desmantelamento dos programas internacionais de saúde? Haverá um retrocesso do cuidado coletivo em favor da responsabilização individual? Operará como um 'Estado mínimo' ou empreenderá ações características de um 'Estado autoritário seletivo'? Como profissionais da saúde, movimentos sociais, cientistas e outros grupos estão se organizando para resistir ao

autoritarismo e ao desmantelamento das instituições? Essas questões exigem análises críticas e reflexivas. No Comitê de Pesquisa 15 da ISA, esperamos que o próximo Fórum Internacional em Rabat proporcione um espaço seguro e acolhedor para diálogos significativos e trocas construtivas. Estamos ansiosos para encontrá-los em Rabat!

رسالة من رئيس RC15

التحيات من لجنة أبحاث الجمعية الدولية للعلوم الاجتماعية 15، علم الاجتماع الصحي!

إن الفترة التي تلت نهاية الحرب العالمية الثانية عرضت توسعاً في النقاشات المتعددة الأطراف بين الدول، واستمراراً لذلك، أسست نظاماً عالمياً قائماً على المنظمات الحكومية الدولية. وعلى مدى عقود، نجحت الدول المتّحدة من خلال مؤسسات مختلفة في إيقاف انتشار الأشكال التعصّبية. وعلاوة على ذلك، قدّمت مبادرات تهدف إلى الحد من الفقر والجوع والأمراض التي يمكن الوقاية منها. ومع ذلك، وعلى مدار هذه العقود، فإن الخطاب الدبلوماسي فشل في إرساء وحدة عالمية قادرة على تعزيز الصحة والرفاهية للجميع في جميع أنحاء العالم. نشهد حالياً التخلي عن التعددية وتراجع مؤسساتها، مع صعود الاستبداد في مختلف البلدان. لقد لاحظنا عودة ظهور "الحالة الطبيعية" التي تجلّت في فرض المصالح التجارية وإهمال الصحة العامة العالمية والجماعية. هذا هو ومن تُطرح فيه أسئلة مُلحة كثيرة: أيّ الوكالات أو البرامج أو هياكل الصحة العامة ستصمد في وجه تخفيضات الميزانيات والأجندات السياسية والتغييرات التنظيمية؟ ما هي المجموعات أو القطاعات المؤسسية والأيدولوجية والسياسية التي ستستفيد من هذا التفكيك؟ كيف يؤثر تفكيك المنظمات العالمية ونزع الشرعية عنها على

إنتاج المعارف العلمية وتداولها في مجال الصحة؟ ما هي التداعيات العالمية لتفكيك برامج الصحة الدولية؟ هل سترجع عن الرعاية الجماعية لصالح المسؤولية الفردية، وتعمل كـ"دولة دنيا"، أم ستتخذ إجراءات تميز " دولة استبدادية انتقائية"؟ كيف ينظم المهنيون الصحيون والحركات الاجتماعية والعلماء والمجموعات الأخرى أنفسهم لمقاومة الاستبداد وتفكيك المؤسسات؟ هذه هي بعض الأسئلة الملحة التي تتطلب تفكيرًا عميقًا ونقدًا. في لجنة أبحاث الجمعية الدولية للعلوم الاجتماعية 15 ، نتمنى أن يوفر المنتدى الدولي القادم في الرباط مساحة آمنة وداعمة للحوار والتبادل الهادف. ونراكم على خير قريبًا في الرباط.

نيلسون فيليس دي باروس

Mensaje del Presidente del RC15

Saludos del Comité de Investigación 15, Sociología de la Salud, de la ISA,

El período inmediatamente posterior al fin de la Segunda Guerra Mundial amplió los debates multilaterales entre países y, como consecuencia, estableció un orden mundial basado en organizaciones intergubernamentales. Durante décadas, las naciones, unidas a través de diversas instituciones, lograron frenar la propagación de ciertas formas de intolerancia. Además, impulsaron iniciativas para reducir la pobreza, el hambre y las enfermedades prevenibles. Sin embargo, a lo largo de estas décadas, la retórica diplomática no logró establecer una unidad global que pudiera promover la salud y el bienestar para todos, en todo el planeta. Actualmente, asistimos al abandono del multilateralismo y al declive de sus instituciones, marcado por el auge del autoritarismo en diferentes países. Hemos observado el

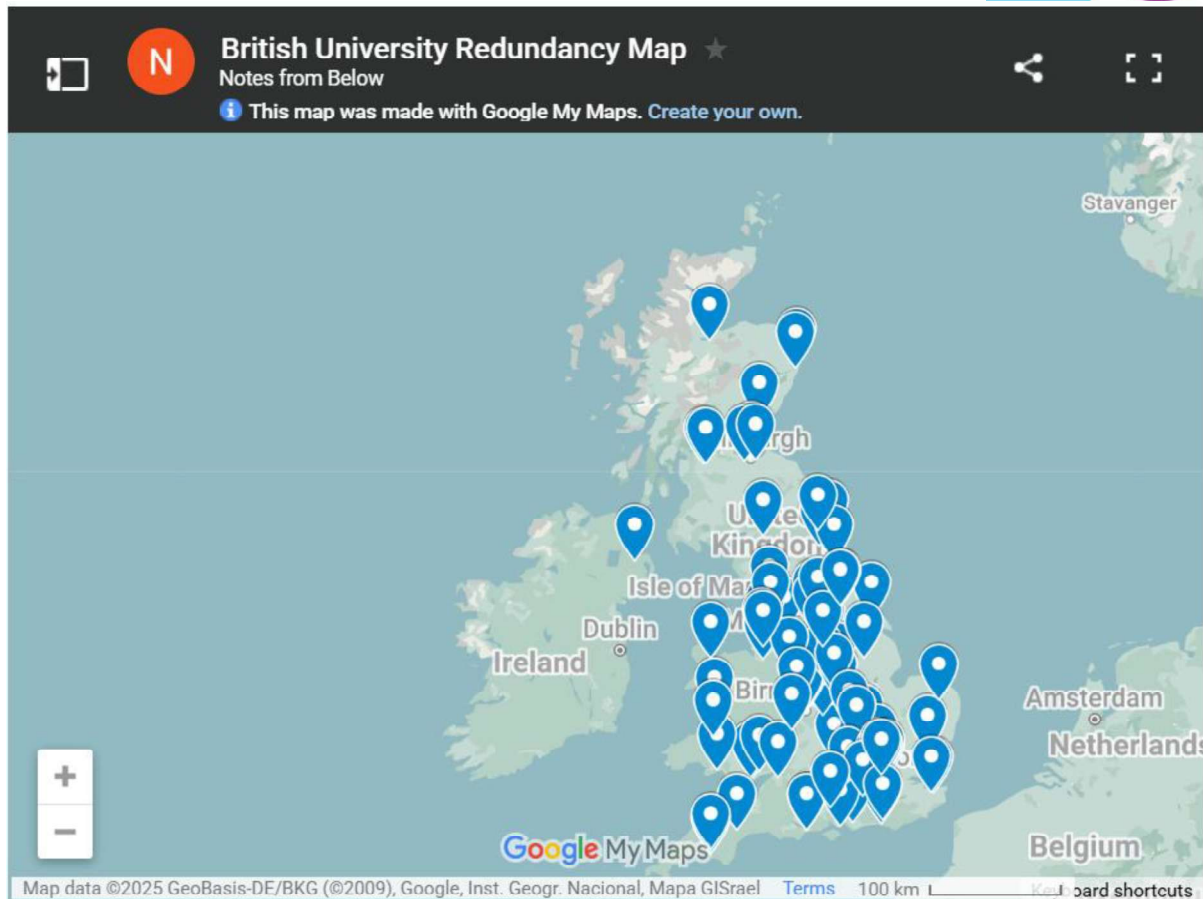

resurgimiento de un "estado de naturaleza", manifestado en la imposición de intereses comerciales y el descuido de la salud pública global y colectiva. Este es un momento de muchas preguntas urgentes: ¿Qué agencias, programas o estructuras de salud pública sobrevivirán a los recortes presupuestarios, las agendas políticas y los cambios regulatorios? ¿Qué grupos o sectores corporativos, ideológicos y políticos se beneficiarán de este desmantelamiento? ¿Cómo afecta el desmantelamiento y la deslegitimación de las organizaciones globales a la producción y circulación del conocimiento científico en el ámbito de la salud? ¿Cuáles son las repercusiones globales del desmantelamiento de los programas internacionales de salud? ¿Se replegará de la atención colectiva en favor de la responsabilidad individual, funcionará como un "estado mínimo" o emprenderá acciones características de un "estado autoritario selectivo"? ¿Cómo se organizan los profesionales de la salud, los movimientos sociales, los científicos y otros grupos para resistir el autoritarismo y el desmantelamiento de las instituciones? Estas son algunas preguntas urgentes que exigen una reflexión profunda y crítica. En el Comité de Investigación de la ISA 15, esperamos que el próximo Foro Internacional en Rabat ofrezca un espacio seguro y propicio para un diálogo e intercambio significativos.

¡Esperamos verle pronto en Rabat!

Nelson Filice de Barros

Solidarity Statement on the Crisis in UK Higher Education

The ISA Research Committee 15 – Sociology of Health expresses its solidarity with all UK higher education institutions currently facing restructures, closures and redundancies. These are unprecedented and turbulent times for the sector, with many staff members at risk of job loss in a society already under significant strain. It is deeply disheartening to witness the abrupt dismissal of academic staff who have contributed profoundly to the advancement of scientific knowledge and the upskilling of society through the education of thousands of students. Equally concerning is the loss of professional and administrative colleagues who have sustained the day-to-day functioning of our institutions for many years. These job losses have serious repercussions for the physical, psychological and emotional well-being of staff, many of whom are experiencing sleepless nights, heightened stress, and escalating anxiety. A significant number are senior employees who have dedicated their entire careers to academia. It is deeply concerning to consider what alternatives might be available to them when their professional lives have been so firmly rooted in the higher education sector. Much solidarity to all and much solidarity to the Unions who have relentlessly fought on behalf of their members.

Reflections on the First 128 Days of the Trump Administration

Susan E. Bell, Drexel University

Five years ago, George Floyd was suffocated by police in Minneapolis, Minnesota. His murder launched uprisings of the people in every single state of the US and worldwide. The campaign for racial justice appeared to be on the cusp of instigating massive social change. Five years later, the landscape is very different, with authoritarian regimes gaining power; and

upswings in violence, war, and suffering in Europe, the Middle East, Africa, and South, Central, and Latin America.

In the United States, things changed dramatically on January 20, 2025, when Donald Trump was sworn into office. Immediately, President Trump began to trample on the US Constitution and infrastructures of governance. In the United States, there are three equal branches of governance: the Executive (e.g. President and cabinet), the Legislative (e.g., Congress), and the Judicial. The Trump Administration has ignored this system of governance. It has extended the Executive branch far beyond its Constitutionally legitimate reach. To put it bluntly, the Trump Administration is acting as an authoritarian government.

Regarding the Legislative branch (the US Congress), for example, the Executive branch (the Trump Administration) cancelled federal contracts and grants that have already been approved by Congress. This action has stopped research funded by the National Institutions of Health and other federal agencies and is decimating research programs at universities. It has halted many federally funded graduate and postdoctoral fellowships, which have supported US and international students and thereby fostered collaborations and connections that are so important to the research enterprise globally. The Trump Administration has also dismantled USAID (the US Agency for International Development) and PEPFAR (the President's Emergency Plan for AIDS Relief). As a result of these abrupt cuts, 300,000 people have already died (reported by National Public Radio, May 28, 2025). Legal decisions

in the years since President Richard Nixon (1969-1974) have reaffirmed that the President does not have the right to overrule funds already approved by Congress.

In both “houses” of Congress, the House of Representatives and the Senate, there are Republican parties in the majority; this is President Trump’s party, and any Republican members of Congress that vote against his program have been threatened personally and politically. As a result, Congress has approved the Trump Administration’s nominations of unqualified people for its executive branch. A particularly egregious example of this in health is the appointment of lawyer and vaccine skeptic Robert F. Kennedy Jr. as the Secretary of the US Department of Health and Human Services. Although members of the Democratic party have consistently challenged the Administration’s actions, they have not been able to muster enough votes by members of the Republican party to stop the Administration’s unconstitutional actions or turn down its unqualified nominations or policies.

Regarding the Judicial system, for example, the Trump Administration has deported people or sent them to detention centers in the US without cause; it has ignored rulings by federal judges and the Supreme Court to bring them home. The Administration has ignored the right to trial (habeas corpus) enshrined in the Constitution. Hundreds of lawsuits have been filed against the Trump Administration and judges have to a large extent ruled against the Administration. However, the legal system in the US does not work swiftly. The Trump Administration has taken

advantage of this slow pace to destroy agencies, research agendas, and universities de facto, by exercising power as if it were already de jure (legally constituted).

Attacks against universities are not new, but the Trump Administration has distinguished itself by launching such broad and deep cuts to the heart of what universities do and what they represent. The first attacks were on indirect rates for grants and then the cancellation of active research awards across the country. Indirect rates add a percentage to federal grants that covers an organization's overhead and administrative costs; this practice was created by the US government after WWII to help fund university research infrastructure that is shared across grants. The cancellation of grants has already led to layoffs of project personnel. Universities will not be able to cover such a large loss of funding. As illustrated by its current attack on Harvard University, the Trump Administration is challenging the university's student body, admissions policy, its faculty, research institutes and programs, and its (constitutional) right to make decisions based on science, knowledge, and careful planning. With its wealth and (intellectual) power, Harvard is an obvious target for an authoritarian government. At the same time, it is well positioned to resist authoritarianism.

In these times, we sociologists can and should resist authoritarianism in our home institutions and countries and seek to foster and grow connections across the world through professional organizations like the International Sociological Association.

RC15 in the Upcoming V ISA Forum of Sociology

The official online programme has been [published](#). Here is a pick to our RC sessions and the joint sessions organized with other RCs:

Monday, 7 July 2025

09:00 - 10:45

RC15 09:00 - 10:45
219 Using Innovative Approaches to exploring Health and Medicine (Part 1)
 📍 FSE031 (Faculty of Education Sciences (FSE))

RC15 09:00 - 10:45
220 How Socio-Cultural Contexts Shape Conceptions of Health, Medicine and Care (Part 1)
 📍 FSE030 (Faculty of Education Sciences (FSE))

11:00 - 12:45

RC15 11:00 - 12:45
221 The Interaction between Policies and Practices of Medicine and Healthcare
 📍 FSE030 (Faculty of Education Sciences (FSE))

RC11 11:00 - 12:45
JS-13 Addressing Gentrification, Displacement, and Health Among Older Adults
 📍 SJES004 (Faculty of Legal, Economic, and Social Sciences (JES))

13:00 - 14:45

RC15 13:00 - 14:45
222 How Technological Optimism Shapes Health, Medicine and Healthcare
 📍 FSE030 (Faculty of Education Sciences (FSE))

RC22 13:00 - 14:45
JS-31 Health, Religion, and Spirituality. Interstices in a Complex Field of Knowledge. (Part I)
 📍 SJES003 (Faculty of Legal, Economic, and Social Sciences (JES))

15:00 - 16:45

RC15 15:00 - 16:45
223 Choice and Constraint in Healthcare
 📍 FSE030 (Faculty of Education Sciences (FSE))

RC46 15:00 - 16:45
JS-48 Planetary Health—Challenges to Social and Health Disparities in the Context of Global Health
 📍 SJES023 (Faculty of Legal, Economic, and Social Sciences (JES))

Tuesday, 8 July 2025

09:00 - 10:45

RC15 09:00 - 10:45
224 Culture Matters: Taking into Account Cultural Context in Health Policy Making I
 📍 FSE030 (Faculty of Education Sciences (FSE))

RC11 09:00 - 10:45
JS-54 Aging and Issues of Illness, Medical Care and Wellbeing
 📍 SJES004 (Faculty of Legal, Economic, and Social Sciences (JES))

11:00 - 12:45

RC15 11:00 - 12:45
225 How Socio-Cultural Contexts Shape Conceptions of Health, Medicine and Care (Part 2)
 📍 FSE030 (Faculty of Education Sciences (FSE))

RC28 11:00 - 12:45
JS-80 Social Determinants and Consequences of Early Life Health
 📍 FSE035 (Faculty of Education Sciences (FSE))

13:00 - 14:45

RC15 13:00 - 14:45
226 Using Innovative Approaches to exploring Health and Medicine (Part 2)
 📍 FSE030 (Faculty of Education Sciences (FSE))

RC22 13:00 - 14:45
JS-90 Health, Religion, and Spirituality. Interstices in a Complex Field of Knowledge. (Part II)
 📍 SJES003 (Faculty of Legal, Economic, and Social Sciences (JES))

15:00 - 16:45

RC15 15:00 - 16:45
227 Rethinking Public Health Governance for a Pandemic Age I
 📍 FSE031 (Faculty of Education Sciences (FSE))

RC15 15:00 - 16:45
228 The Marginality of Complementary and Alternative Medicine and the Prospects of Integrated Healthcare: The Influence of Knowledge, Power and Interests
 📍 FSE030 (Faculty of Education Sciences (FSE))

Wednesday, 9 July 2025

09:00 - 10:45

RC15

09:00 - 10:45

JS-122 Ways of Vaccination: Production, Allocation, Utilization, and Atonement for Side-Effects

📍 SJES008 (Faculty of Legal, Economic, and Social Sciences (JES))

11:00 - 12:45

RC22

11:00 - 12:45

JS-133 Science, Health, and Religion: Intersections in the Field of Assisted Reproductive Technologies (ART)

📍 SJES003 (Faculty of Legal, Economic, and Social Sciences (JES))

13:00 - 14:45

Grants Awarded to RC15 Members

The Australian Research Council Discovery Award for a 3-year project, 'Securing posthumous digital data: Australians' views and practices', was granted to **Alan Petersen**, in collaboration with Claire Wilkinson (Co-Cl, University of West of England) and Diana Bowman (Arizona State University). The research will include analysis of the views of patient communities, palliative care communities, among others.

New Publications by RC15 Members

We are happy to announce **Jae-Mahn Shim's and Seung-Hyun Baek's *A Sociological Perspective on Blood Plasma Donation During the Pandemic, Convalescent Gifts and Liminality***, published by Routledge, June 2024.

For more information, please see <https://www.routledge.com/A-Sociological-Perspective-on-Blood-Plasma-Donation-During-the-Pandemic-Convalescent-Gifts-and-Liminality/Shim-Baek/p/book/9781032797564>

On behalf of RC15 - Congratulations, Jae-Mahn!

Богдан, И. В. (2025). Цифровые аспекты психотипирования в социологических исследованиях (на примере управленческих задач здравоохранения // **Вестник Биомедицина и социология**, Т. 10, № 1. – С. 2-10. – DOI 10.26787/nydha-2618-8783-2025-10-1-2-10. [Bogdan, I. V. Digital aspects of psychotyping in sociological research (on the example of management tasks of health care // **Bulletin of Biomedicine and Sociology**, Т. 10, № 1. – С. 2-10. – DOI 10.26787/nydha-2618-8783-2025-10-1-2-10.]

Call for Reviewers

Health: An Interdisciplinary Journal for the Social Study of Health, Illness and Medicine is looking to expand their pool of reviewers.

Would you like to stay up-to-date with cutting edge empirical, theoretical, critical work on health in the social sciences and humanities? Can you offer your expertise to help colleagues develop their research outputs to the highest academic standards. Would you like to contribute to the development of your discipline?

The journal receives a large number of submissions and are looking to expand the pool of reviewers to ensure that authors receive detailed and timely feedback. A broader range of regular reviewers will help the journal to maintain its high standard of scholarship and editorial support for a rapidly developing and diversifying readership and community of authors.

By focusing on the critique of norms and power relationships *Health* provides an international forum with the breadth of outlook required by sociologists, social psychologists, social and cultural theorists and others who are addressing healthcare issues that cross disciplinary boundaries.

Reviews are conducted via the ScholarOne submission platform and you can create an account and complete your profile here

where you will be guided to add your areas of interest so appropriate manuscripts can be allocated to you. If you create an account you are under no obligation to review any particular paper.

To be considered as a reviewer you should hold a doctoral degree, be a university lecturer or researcher, and/or possess relevant professional work experience. If you are new to reviewing you will be supported in the process by the editorial team. We especially welcome reviewers from the Global South.

Questions? Write to the editorial team:

Associate Professors Rebecca E. Olson & Christopher Till,

health.journal.eic@gmail.com
